

MANUFACTURER CAPABILITIES

Premium Talent. Real Results.

Setup-capable CNC machinists and specialized manufacturing talent. **Local placements and traveling W-2 specialists, nationwide.**

WHAT WE SUPPORT

Production backlogs and surges, hard-to-fill technical roles, plant launches, second-shift coverage, and machine-specific skill gaps.

SPECIALIZED CAPABILITIES

Machining & programming

CNC mill and lathe, setup and programming, 5-axis, Swiss, mill-turn, manual machining, and precision grinding.

Toolroom & manufacturing support

Toolmakers, moldmakers, EDM, quality inspection, CMM/metrology, process technicians, manufacturing engineering, and automation/controls.

HOW MAVERICK VETS CNC MACHINISTS

Founder Maverick Boudreaux personally screens CNC candidates against the work required. Technical discussions cover:

- 01 Setup ownership** - prints, datum strategy, workholding, tooling, and offsets.
- 02 Programming** - controls, edits, CAM experience, and prove-out responsibility.
- 03 First-piece inspection** - tolerances, measurement methods, and corrections.
- 04 Troubleshooting** - tool wear, chatter, finish, variation, and safe escalation.
- 05 Assignment fit** - machine experience, independence, shift, and availability.

ENGAGEMENT OPTIONS

Local/project-based support or traveling assignments. Traveling engagements typically start with a 90-day term and an option to extend. Titan coordinates travel and per diem. No direct-hire buyout fee; final scope and terms are documented in the agreement.

Tell us what the work requires.
